

Small in size, huge in performance.
Perfect for your small workgroup.

Fast, affordable desktop colour printing for every small workgroup.

With one of the smallest footprints in its class, the C3600 brings fast, affordable, high quality colour to the busiest offices.

Based on our award winning single-pass digital LED technology this latest addition to the C3000 Series comes with the features and functionality that you might expect to find only in larger, more expensive machines.

Impressive performance

Capable of printing as many as 16 colour pages per minute (ppm) (20ppm in black and white), and with the first page appearing in just 12 seconds or even less, it's not just one of the smallest printers for the price, but one of the fastest.

Unique space saving design

Compact design and easy access output tray the C3600 is perfect when space is at a premium. A front-facing LCD display gives clear, easy to understand status information and the top lifts up for quick replacement of the toner cartridges and drums.

Developed for endurance and economy

With separate drums and toner cartridges, you only ever have to replace what needs replacing. And with drums that print up to an impressive 15,000 pages, you can print more, for longer, as well as saving money.

Built for reliability

With fewer moving parts there's less to go wrong. That's why OKI Printing Solutions pioneered the use of digital LEDs and it's why we continue to use them in all our colour printers. Combine that with single-pass printing technology and you'll see why our printers just keep going: just what you need for a small but busy workgroup.

Powerful productivity software

The C3600 comes with a whole suite of useful productivity and creative software, making it ideal for the office environment:

- Print Control - for tracking usage and controlling access for tighter cost control.
- PrintSuperVision - browser-based monitoring and management of all your network printers, regardless of make or model.
- Template Manager 3.0 - editable, easy to use templates for creating a wide range of office documents.
- Color Correct - for fine-tuning the standard palette of Microsoft Office applications.
- Color Swatch - for reproducing custom colours such as those in corporate logos.
